SCAFFOLDING VERTICAL

LEDGER

- **Scaffolding offers several advantages in construction and other fields, primarily related to safety, accessibility, and efficiency. It provides a stable, elevated platform for workers, reducing the risk of falls and improving access to high areas. Additionally, it can enhance productivity by creating a more comfortable and efficient working environment.**

ACRO SPAN & I-BEAM

- Adjustable spans, like adjustable prop spans or telescopic spans, are used to support centering ply/plates, especially during the construction of slabs. They provide adjustable support and are crucial for stability, particularly at slab heights of 10 feet or more.
- Scaffolding channels, typically made of mild steel, are structural components used in construction to provide support and stability.

U-JACK & BASE JACK

- **U jacks and base jacks are essential scaffolding components for height adjustment and stability.**

SPIGOT PIN

- **A scaffolding spigot pin is a crucial connecting component, typically made of steel, used to join scaffolding tubes or frames end-to-end.**

VERTICAL SIZE	LEDGER SIZE (BLADE TO BLADE)	PROP JACK (SIZE IN MTR)	MS PLATE
3 MTR: 6 CUP	1450 MM	2X2	2'X3'
2.5 MTR: 5 CUP	1250 MM	2X2.5	21"X3'
2 MTR: 4 CUP	1200 MM	2X3	18"X3'
1.5 MTR: 3 CUP	1150 MM	1.5X2	15"X3'
1 MTR: 2 CUP	950 MM		12"X3'
0.5 MTR: 1 CUP	1000 MM		9"X3'
